Welcome

Thank you for trusting us with your purchase of the 902 Easy Educator Remote Education Collar. We have made every attempt to provide you with the most technologically advanced product using the most stringent quality and manufacturing standards.

We are confident you will be pleased with the results you will attain with the 902 Easy Educator. Please remember you will get better results with the use of low level stimulation combined with consistent training techniques. The use of high levels of stimulation should only be used as a last resort and in life-threatening situations.

Good luck with your training and please feel free to contact us should you have any questions.

* This guide will familiarize you with the basic functions, programming features and the contents of the 902 Easy Educator.

Additional information and help is available on www.ecollar.com and by e-mailing customerservice@ecollar.com. To talk to a live team member please contact our customer service department, 8 AM to 8 PM E.S.T., 1-855-326-5527 or (260) 357-0051. Your total satisfaction is our only concern.

CHARACTERISTICS

- 1/2 mile Range
- Employs Quick Charge Li-Polymer Batteries
- Convenient Intensity Dial for Quick Adjustment
- Stimulation Levels Adjustable from 0 to 100 Collar
- Receiver Light for Night Tracking
- “Lock and Set” Stimulation Safety Feature
- User Adjustable Boosting Levels
- Provides 2 Control Buttons for Each Dog
- Patented “I” Mode Provides Instant Stimulation
- Waterproof and Shock Resistant
PACKAGE CONTENTS

- Ergonomic Transmitter
  - Remote-Sender
- Waterproof Collar Receiver
  - High Quality Biothane Strap
- Quick Start Owner’s Guide
- Test Light
- Contact Point Tool
- 5/8” and ¾” Contact Points
- Lanyard
- Battery Charger
- Splitter Cable

- 902 Easy Educator -
Turning ON/OFF the EZ-902 System

Turn ON/OFF the transmitter by pressing the lower right button for 1 second.

To turn ON/OFF the collar receiver simply position the red dot on the backside of the transmitter against the red dot on the collar receiver for 1 second.

Charging Instructions

Please charge the units on or before the low battery indication. It is best not to wait until the batteries are fully drained to avoid damage. To charge insert the micro USB into the transmitter and the charge plug into the collar receiver as pictured. Store with 50% charge in cool dry place.

Low Battery Indication
Transmitter: One bar remaining on the LCD display indicates charging is needed.
Collar Receiver: Yellow light indicates low and red indicates very low battery life.
# EZ-902 Functions

Easy Educator 902 provides 5 types of stimulation sensations, tone, and vibration.

## Stimulation

Buttons Descriptions and Stimulation Button Assignments

The 902 Easy Educator has 4 control buttons which are assigned to stimulation, vibration and tone. S1 / S3 buttons are programmed for Dog 1 and S2 / S4 buttons are programmed for Dog 2. It also has 2 program buttons for changing modes (P) and turning the unit ON and OFF. The convenient volume dial provides for easy and sight free control of the stimulation level.

</table>

1. To start Instant mode, rotate volume to level 0 and press a button set to continuous, "C" mode activates the "I" mode when pushed on level "0"
2. To exit from Instant mode, press any button or wait for the 45 second time out

- 902 Easy Educator -
I Mode

"I" Instant Stimulation Mode
The "I" mode is a patented feature which allows the stimulation to increase gradually as determined by the user. The gradual introduction of stimulation provides a more gentle sensation and removes the startling effect sometimes associated with applying a constant level of stimulation. The dog produces less cortisol and learns to avoid the higher levels by responding quickly to the command. The user has the flexibility of increasing the stimulation fast if in an emergency situation which warrants a quick response from the dog. Slow dial movement is best.

How Instant Stimulation “I” Mode Works
1. Change the mode of any S button to Continuous if not already programmed to “C” mode: The stimulation dial must be turned to “0” to enter the “I” mode.
2. To start the “I”, push the assigned Continuous button. The display will flash On to indicate it is on and ready to begin stimulation.
3. Turning the stimulation will now activate the stimulation at the setting of the dial and continue for 45 seconds. Returning to “0” will reset the 45 second safety timer.
4. If you do not rotate the dial for 45 seconds the “I” mode will turn off and the control button will need to be pushed again.
5. Pushing any of the other control buttons will turn off the “I” mode and therefore require the “I” mode control be pushed again to reactivate it.
6. Again, to exit the Instant Mode, press any control button or wait for 45 seconds.
Lock and Unlock Stimulation Level

Lock and Unlock Stimulation Level for Dog 1
1. Check LCD display to confirm 1D icon is blinking.
2. Set the desired stimulation to lock by rotating the volume dial.
3. Press P button and S3 simultaneously and hold one second to lock.
4. Check LCD display to confirm 1D icon changes blinking to solid
5. To unlock press P button and S3 simultaneously and hold for one second.
6. Check LCD display to confirm 1D icon changes from solid to blinking.

Lock and Unlock Stimulation Level for Dog 2
1. Check LCD display to confirm 2D icon is blinking.
2. Set the desired stimulation to lock by rotating volume dial.
3. Press P button and S4 simultaneously and hold one second to lock.
4. Check LCD display to confirm 2D icon changes blinking to solid
5. To unlock press P button and S4 simultaneously and hold one second.
6. Check LCD display to confirm 2D icon changes from solid to blinking.

* Important Note: Blinking “1D” or “2D” Indicates Unlocked Stimulation
Solid “1D” or “2D” Indicates Locked Stimulation
Booster Level Setup

**Boost Level Setup for Dog 1**

1. Change the mode of S1 or S3 button to Momentary if not already programmed to “M” mode.

2. Change the Stimulation level to “0”  
   *(Stimulation level should be unlocked)*

3. Press Momentary button for more than 5 sec to enter the Boost Level Change Mode.

4. Check LCD displays M+ / C+ icon

5. Rotate the dial to change the boost level. *(The range of boosted level is from 1 to 60, default is 5)*

6. Press Momentary Button again to exit from Boost Level Change Mode.

**Boost Level Setup for Dog 2**

1. Change the mode of S2 or S4 button to Momentary if not already programmed to “M” mode.

2. Change the Stimulation level to “0”  
   *(Stimulation level should be unlocked)*

3. Press the momentary button for more than 5 sec to enter the Boost Level Change Mode.

4. Check LCD displays M+ / C+ icon

5. Rotate the dial to change the boosted level. *(The range of boosted level is between 1 and 60, default is 5)*

6. Press Momentary Button again to exit from Boost Level Change Mode.
Lost Transmitter Activation

Lost Transmitter Activation (6 Hour Timer)

1. Change the **Stimulation** level to “0”
2. Press ON/OFF button and then press P button simultaneously.
3. **One short** beep will sound confirming the activation of the locator timer.
4. To deactivate, press ON/OFF button and P button one more time.
5. **Two short** beeps will sound confirming the deactivation of the locator timer.
6. The transmitter will start beeping exactly 6 hours from activation so plan your excursion accordingly.
Pairing/Syncing

When you change transmitters or collar receivers they will need to be paired/synced to each other for them to communicate with each other.

**Pairing for Dog 1 (ON/OFF + S3)**
1. Turn on the Transmitter.
2. Rotate the volume dial to “0”.
3. Turn off the collar receiver. Put the red dot on the transmitter against the red dot on the collar receiver for more than 5 seconds until the solid green light starts blinking on and off rapidly.
4. Press the ON/OFF button and then press the S3 button (Front Top) simultaneously.
5. Listen for confirmation sound from the collar receiver.
6. Test the collar receiver to make sure it accepted the new transmitter code.

**Pairing for Dog 2 (ON/OFF + S4)**
1. Turn on the transmitter.
2. Rotate the intensity dial to “0”.
3. Turn off the collar receiver. Put the red dot on the transmitter against the red dot on the collar receiver for more than 5 seconds until the solid green light starts blinking on and off rapidly.
4. Press the ON/OFF button and then press the S4 button (Front Bottom) simultaneously.
5. Listen for confirmation sound from the collar receiver.
6. Test the collar receiver to make sure it accepted the new transmitter code.
**EZ-902 Two Dog Default Settings**

IMPORTANT INFORMATION

About Contact Points:
Many dogs in our modern society have developed sensitivity to nickel which is a metal in all stainless steel products. Keep a watchful eye on your dogs skin where the contact points are touching his/her skin for redness or any signs of irritation. This should be done hourly at first and slowly transition to once every four hours after a month of daily wearing of the e-collar. At first notice of redness immediately switch to one of our hypo allergenic contact points, we offer both nickel free stainless steel and titanium contact points. Dogs with sensitive skin and certain breeds with known skin sensitivities like Pit Bull Terriers and Boxers should be switched early in the process as a precautionary move.

Nickel Free Stainless Steel
