Welcome to the World of Low Level E-Collar Training

Thank you for trusting us with your e-collar purchase, we appreciate it and will do everything possible to exceed your expectations.

We have taken great care to provide ample safety features to assure a pleasant experience for you and your dog.

It is important to condition your dog to low level stimulation by pairing it with soft leash pressure; you will always get better results with low level stimulation combined with consistent training techniques and a patient heart. The use of high levels of stimulation should only be used as a last resort and in life-threatening situations.

We recommend all first time e-collar users obtain professional help or immerse themselves in the many online resources.

Feel free to contact our customer service to obtain information on a professional trainer well versed in low level e-collar training in your area.

Your complete satisfaction is our only concern.

> * This guide will familiarize you with the basic functions, programming features and the contents of the Pro Educator.
> Additional information and help is available on www.ecollar.com and by e-mailing customerservice@ecollar.com.
> To talk to a live team member please contact our customer service department, 8 AM to 8 PM E.S.T., 1-855-326-5527 or (260) 357-0051.

2. Confirm M+ or C+ is selected for this button.
3. Rotate volume dial to setup boosting level from 1 to 60.
4. Press this stimulation button again for more than 1sce to save the boosting level. Confirm icon(M+ or C+) blinked one time.
5. Press P button to save and exit from Button Program Mode.

Buttons Description and Stimulation Button Assignment

The Pro Educator has 4 control buttons that can be programmed to any one of the seven stimulation modes, vibration and/or tone.

The 2 program buttons for programming the control buttons and turning the unit ON and OFF are conveniently located on the right side.

The volume/stimulation dial provides for easy and sight free control of the stimulation level using your thumb.

• Volume Dial

S1-Button •
S3-Button •
• P-Button

S2-Button •
S4-Button •
• ON/OFF-Button

Control Buttons	Function	Action
ON/OFF	Power ON/OFF	Press 1 Second to Turn ON Press 2 Seconds to Turn OFF
P	Programs the Functions of the 4 Control Buttons; S1, S2, S3, and S4 Buttons. It also allows entry into the Tracking Light, Boost Level, Lost Transmitter Beeper, and Receiver Pairing Modes.	Press "P" for 1 Second to Enter Programming Mode. (Display will Flash) Press again to Exit the Mode. Or wait for the 30 Second Time Out Feature
Pressing the ON/OFF Button While in Programming Mode Toggles Through the Tracking Light, Boost Level, Lost Transmitter Beeper, and Receiver Pairing Modes	Turns ON/OFF Night Tracking Light, Selects Boost Level for Each Dog, Turns ON/OFF Lost Transmitter Beeper, Pairing/Syncing of Collar Receivers.	Toggles the Transmitter through the additional modes available on the Pro Educator
Pressing the ON/OFF Button and S1 Control Button at the same time.	Toggles Between Dog 1, Dog 2 and Dog 3 modes.	The LCD display will show 1, 2, or 3 and will provide a confirmation beep.

* Lock and Unlock Stimulation Level

1. Press "P" button for more than 1 sec to enter into Button Program Mode.
2. Confirm all the icons are blinking and **PR** is displayed.
3. Assign "M" or "C" function to any of the four control buttons by pressing that button until "M" or "C" are displayed.
4. Rotate the stimulation dial to the desired level; now push the particular control button for 1 second until the 1, 2, or 3 icon stops flashing. Solid icon indicates locked stimulation.
5. Press "P" button to save and exit from the Program Mode.
6. To unlock the locked stimulation level, repeat above step and confirm by noticing the 1, 2, or 3 dog icon is flashing.

Special Note: In the multi-dog modes, any of the dogs can be locked or unlocked.

Flashing icons indicate unlocked and solid icons indicate locked.

Maximum Durations for Stimulation, Vibration, Tone

- Continuous Stimulation "C" Mode : 10 Seconds.
- Continuous Boosted Stimulation "C+" Mode : 10 Seconds.
- Ramp "R" and Ramp Plus "R+" Modes : 10 Seconds
- Instant Stimulation "I" Mode : 45 Seconds
- Vibration and Tone Modes : 30 Seconds.

1. Assign instant stimulation "I" mode function to one of the control buttons.
IMPORTANT NOTICE : The stimulation dial must be turned to "0" to start the "I" mode.
2. To start the "I" push the assigned control button the display will flash **On** and is ready to begin stimulation.
3. Turning the stimulation will now activate the stimulation at the setting of the dial and continue for 45 seconds.
Returning to "0" will reset the 45 second safety timer.
4. If you do not rotate the dial for 45 seconds the "I" mode will turn off and the control button will need to be pushed again.
5. Pushing any of the other control buttons will turn off the "I" mode and therefore require the "I" mode control be pushed again to reactivate it.
6. Again, to exit the Instant Mode, press any control button or wait for 45 seconds.

The 4 Control Buttons will be assigned to the Selected Dog pursuant to the following Table :

Control Buttons	Control Button Assignment Table		
	1 Dog Mode	2 Dog Mode	3 Dog Mode
S1-Button	Dog 1	Dog 1	Dog 1
S2-Button	Dog 1	Dog 2	Dog 3
S3-Button	Dog 1	Dog 1	Dog 1
S4-Button	Dog 1	Dog 2	Dog 2

Program Stimulation Buttons and Factory Default Setting

You can assign any 1 of the 9 functions to the S1, S2, S4 and S4 control buttons.

1. Press "P" button for more than 1 second until the LCD is flashing and **PR** is displayed.

2. Press the "S1" button repeatedly until you arrive at the function you desire for the "S1" button.

3. The default setting is "V" for the "S1", the sequence is as follows :

   V ▶ T ▶ M ▶ M+ ▶ C ▶ C+ ▶ R ▶ R+ ▶ I

* **Note :** The "Lock and Set" feature is accomplished by selecting "M" or "C" mode and holding the "S1" button for one second before releasing it. Releasing it too soon will toggle to the next mode. The dog 1 icon will turn solid when in locked mode; flashing dog 1 icon indicates the stimulation is determined by the dial setting.

4. Repeat the same sequence for the S2, S3 and S4 buttons.

**** IMPORTANT NOTICE ****

* **Note :** Sometimes in the multi-dog mode the user needs to recall the settings and/or stimulation level setting of a particular dog because the display always shows the last dog stimulated. Simply enter the programming mode and push the particular dog button you want to recall the setting for, the first push will not change that setting.

5. Press "P" at any time in the programming to return to active use of the training collar.

Factory Default Setting

Control Buttons	Factory Default Settings					
	1 Dog Mode		2 Dog Mode		3 Dog Mode	
S1	1D	Vibration	1D	Vibration	1D	Vibration
S2	1D	Tone	2D	Vibration	3D	Vibration
S3	1D	Momentary	1D	Momentary	1D	Momentary
S4	1D	Instant Mode	2D	Momentary	2D	Vibration
